Nothing Beats 4Site 4 Simplicity

If you're like us, you're probably tired of bloated content management systems with complex functionality that makes it difficult to make simple changes to your website.

You Will Welcome the Change!

What is 4Site?

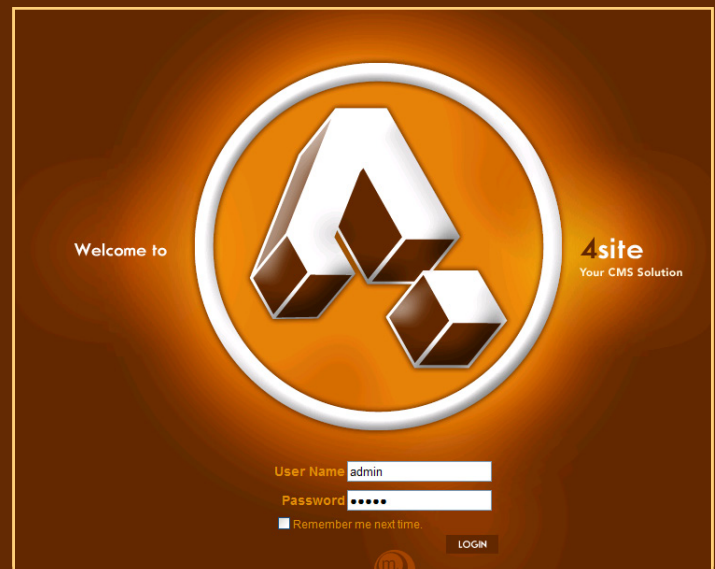

4Site is a Platform

At its core, 4site is a basic content manager. We set out to build a system that lets users make changes quickly, and allows your organization the development flexibility to customize the system according to user needs.

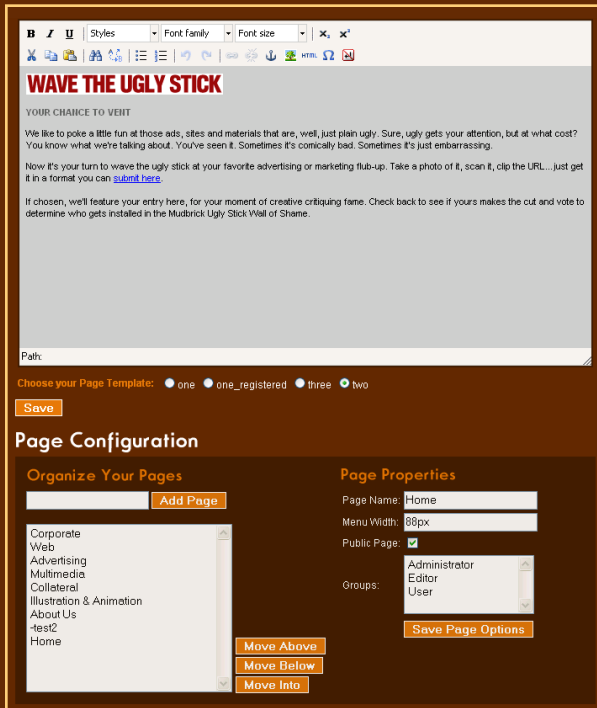

4Site is built using Microsoft's .NET platform for modularity and flexibility. Do you need a content manager for a standard website? It delivers. Do you need a CMS for a blog? It delivers.

One Platform, Multiple Site Disciplines.

Admin Login Screen

In-Line Editor

The Tool

The Beauty of In-Line Editing

The true magic of 4site lies in the ability to intuitively edit your content. You log-in to your site, navigate to the page you want to edit and edit the page! No complex back-end admin panel to search through to find the content you want to edit. Browse your live site, click the "Edit Button" and you're managing content. It's that simple.

Our editor allows a user with the correct permissions to add, edit and delete content; add pages; and manage properties.

The site's content can be set to immediately "Go Live" when changes are made or be queued for an administrator to approve changes. It's your choice!

The Widget System

We know it's nothing new, but our modular plug-in-style system allows us to customize your site's functionality efficiently. With the "Widget Loader", code packages can be installed to extend a sites capabilities.

Widgets In the Base Package Include:

- Gallery Application
- Threaded Comment System
- Form Builder
- File Manager/Download Library
- Search Widget
- RSS Feed Integrator
- News Application
- Static Text Boxes
- Events Calendar

Other Widgets In Development Include:

- eCommerce Widget
- Music Widget
- Wiki-Based Content Widget
- Tagging Widget
- Ad Rotator
- Video Widget

Form Builder Widget

Title	Type	Configure	Delete
New Element	text	Configure	Delete

Control Panel

Visits	278	Browser	Visits	% visits
Absolute Unique Visitors:	165	Firefox	161	57.91%
Pageviews:	3,203	Internet Explorer	74	26.62%
Average Pageviews:	11.52	Safari	40	14.39%
Time on Site:	00:16:01	Opera	3	1.08%
Bounce Rate:	28.06%	Connection Speed	Visits	% visits
New Visits:	53.96%	Unknown	149	53.60%
Current Online Users:	1	Cable	76	27.34%
New Users This Week:	None	DSL	37	13.31%
Edits in the Change Queue:	1	T1	13	4.68%
		Dialup	3	1.08%

Minimal Admin!

Of course there are still some areas that shouldn't be accessible anywhere but on a full fledged admin control panel.

Our back-end Control Panel provides access to user management, form submission data, permissions, edit log and change queues as well as a style editor for customers who want more control of the look of their site.

Our control panel now integrates with Google Analytics for customers who wish to track their traffic with this best-in-class tool.

Technical Spectacle

High Tech That Feels Low Tech. Brilliant.

4Site is built using Microsoft's .NET development platform, in conjunction with Microsoft SQL. That means it's built with a development environment that will be around for a very, very long time. No annoying application upgrades for the foreseeable future, which means you get a stable base to work from.

All you need to get your 4Site implementation up and running is a Windows based hosting account with .NET & SQL options.

Who Needs 4Site?

A Platform to Grow With You

If you're looking for an affordable CMS platform to grow with your needs, stop looking and get 4Site. 4Site was never meant to be the all-in-one solution that many expensive high-end applications claim, 4Site is meant to be the tool that delivers all you need, and nothing you don't.

About MudBrick

Who We Are...

The impetus. We're designers & developers who got tired of watching good clients get fleeced at the hands of big agencies. We got tired of cubicles and dress shirts. We wanted to form relationships with our customers beyond projects and paperwork. We wanted our customers to be able to partner with us, to know us, and not just know as a voice on the other end of a phone. So we broke out and set forth on our mission of great design and goodwill for all!

If we sound like a team you'd like to work with and you'd like to find out more give us a call (717.234.0330) or [email us](#).

Get 4Site...4 Affordability, 4 Flexibility, 4 Simplicity.
